**Abstract:** American sociologist Louis Wirth said that 'Urbanism as a Way of Life' in the American Journal of Sociology in 1938 because more and more people were moving into cities and the urbanization process is stimulated. This hyper growth of cities ensure the "urbanized world". But now a day's urbanism concept is critiqued by sociologists. They polled that urbanism developed a narrower mental structure on citizen of a town. Parallely urbanization stimulates more physical and social problems. In those social problems crime is an important phenomenon. Crime has a vast concept and categories. But crime against woman is a specific type of crime which has a great significant in our personal life, family life. It also says that domestic violence against woman is much affected in child mental growth. We are generated a vulnerable index model using various socioeconomic indicator of crime at Diamond Harbour Municipality, South 24 Pargans District, West Bengal.

**Keywords:** Social Vulnerability, Education Index, Income Index, Life Expectancy Index, Security Index, Time Based Woman Security Index, Vulnerability Index.

### 1. INTRODUCTION

**Etymological Meaning:** "The word *crime* is derived from the Latin root *cernō*, meaning "I decide, I give judgment". Originally the Latin word *crīmen* meant "charge" or "cry of distress." The Ancient Greek word *krima* (κρίμα), from which the Latin cognate derives, typically referred to an intellectual mistake or an offense against the community, rather than a private or moral wrong. In 13th century English *crime* meant "sinfulness", according to etymonline.com. It was probably brought to England as Old French *crimne* (12th century form of Modern French *crime*), from Latin *crimen* (in the genitive case: *criminalis*). In Latin, *crimen* could have signified any one of the following: "charge, indictment, accusation; crime, fault, offense." ... Wikipedia

**Socioeconomic Definition:** According to Sir Harold "A crime is an act or default which prejudices the interests of the community and is forbidden by law under pain of punishment. It is an offence against the state, as contrasted with loot or a civil wrong, which is a violation of a right of an individual and which does not lead to punishment." In generally crime is an activity by group people or individual which is not recognized by a society or an organized constitutional body and those activity must have a punishment.

Semantic meaning of "Crime against woman" may be defined as the physical or mental torture of a woman by individual or group of people (here the gender is not important, beside men women are take apart in crime). Delhi Police Research Bureau classified crime against woman from the base of law. First one is crime against woman under Indian penal code-IPC. Seven types of crimes are enlisted in this category. Those are – Rape, Kidnapping, Death by Dowry system, Physical and Mental torture, Molestation, Eve Teasing, Sealing and baying of woman in the age of 21 and beneath. And the second one is Local and Special Level – SLL crime. Four types of crimes as Dowry System, "Satidaho", illegal business activity about woman, vulgar treatment to woman (Ahuja, 2014) are included on this type of crime.

## 2. BACKGROUND OF THIS STUDY

In 1970<sup>th</sup> a new ideology was developed in geography by D.M. Smith (1977). According this approach geographers must be use their geographical knowledge to reduce the recent problems of human life and ensure wellbeing. Now a day's crime including CAW (Crime against Woman) is a big problem in an urban society. Crime incident and CAW reports takes a major part of news paper. In India Delhi Nirbhaya rape case (16 December 2012), Park Street Rape Case (February 2012) play a significant role to think something about CWA to the Geographers and Sociologist.

CAW has a relation with Geography. Because Crime against Woman is determined some physio socio-economic factors as geographical location, political location, climatic and environmental condition (if we consider the climatic determinism after *Huntington* and Ellen Churchill Semple), age structure, income, security system etc.

## 3. STUDY AREA AND METHODOLOGY

For this study we selected Diamond Harbour Municipality located in South 24 Parganas, West Bengal with the extension of 22° 13' 24"N to 22° 9'29" N and 88° 13' 33" E to 88° 9' 16" E, on the eastern banks of the Hooghly River quite near where the river meets the Bay of Bengal. Diamond Harbour municipality was established in 1982. This small town with a picturesque setting is the gateway to the south-western part of the district. Earlier known as Hajipur, this location was named Diamond Harbour by the British although currently there are no piers or jetties at this location, except for the ruins of a fort. It used to be considered a safe resting spot for oceangoing ships and offered a spectacular view of the river. After the Rupnarayan River joins the Hughli, the river bends south and widens out to a form a huge expanse of water. A little further down, the Haldi River joins it.

For this study we collect some secondary data as demographic data crime data and a sample survey was run by us. This sample survey cover 30% population of each ward.

#### 4. DATA ANALYSIS

##### 4.1. Demographic Data

Diamond Harbour Municipality consist 16 wards with 10.36 km<sup>2</sup> area. According to census 2011 total population of that town is 41802, population density 4035persons/ km<sup>2</sup>. Population growth of last 10 years (2001 – 2011) is 12.3%. Total male population is 21050 and female is 20968. Sex ratio is 950/1000. Literacy rate is 86 % ( male-90%, female – 82%). Major religious community of this city is Hindu and the minor community is Muslim, Sikh and others. 35.4 % people of total population are engaged with various governmental and non-governmental working sectors.

##### Year Wise Population Growth of Diamond Harbour Municipality 1991, 2001, 2011

Year	Population
1991	30266
2001	37234
2011	41802

##### Population Growth of Diamond Harbour Municipality – 2011 Among General, S.C, S.T, & Child

	General	SC	ST	Child
Male	9.60%	22%	-65.60%	-9.60%
Female	15.10%	28.40%	-72.4	-3.50%
Total	12.30%	25%	-55.80%	-6.70%

**Summarized Record of Crime against Woman**

Year	Crime Against Woman
2005	1214
2006	1438
2007	2034
2012	4297
2013	4400
2014	5532
2015	5206
2016	5936

\*Source: Office of the SP South 24 Pargans

From the above data it is clear that Diamond Harbour city is a violated city. Theft, rioting robbery types of crime occurs frequently. But the most dominating crime is CAW. In the year of 2005 the figure was 1214 but in the year of 2016 it reach 5936. Linear relation of CAW with time shows the positive relationship. R2 value is 0.9846 means the degree of its relationship is very high. So it's must say that in feature CAW will get rapid growth.

**4.3. Sample Data Analysis**

Our survey was run in 2017 in the month of Oct. We collect the sample data from the entire wards of Diamond Harbour Municipality. This survey is Random Sample Survey in nature. It covers 30 % population of each ward. Our goal was to find out the actual cause of crime and CAW. Also we are trying to find out the responsible behind CAW and perception about CAW from the grass route of our society the housewife.

**Respondent Opinion Regarding Factors that Influence Crime**

Respondent point out some factors that influence crime. Those are illiteracy, patriarchal system, negligence of police, social awareness etc. Maximum no of the population polled that patriarchal system; negligence of police takes the dominant role to influence crime. At Diamond Harbour there has an officially good police system, recently here developed a Woman Police Station. But reality shows that police system is not working well, at list the inhabitants mark out police negligence behind crime. (Fig – 3))

**Fig3.**

### Victim Age of Woman

From our sample survey 2017 we observed that the age group of 15-20 is the most effected by crime against woman. They are hurrahs in publicly by teasers. Teenagers said that they are suffers the problems specifically some area as River Side, Station area etc. Also the age group of 20- 50 is affected. Inhabitance says that the intensity of crime is getting loss after 30 years of a woman. We have a concept that after marriage, such case as eve teasing, taunting will stop. But that concept is decline lot of women of the city. They conface that are also victimized at open place as market in front of their husband. (Fig – 4)

Fig4.

### Nature of Domestic Violence

In India maximum number of women are suffer with domestic’s violence after marriage. We classified the domestic’s violence into three categories – Physical Violence, Mental Violence, and Sexual Violence.

Inhabitance of Diamond Harbour polled that above those types of domestic violence, mental torture is most frequently. Also Physical Torture is so usually in ward no 1, 2 etc. Sexual torture is rear in this city region. But we must say that is sexual is rear or not it is under debate. Most of sexual torture is not come out in our society. In our society we always try to put off the Sexual incident. (Fig – 5)

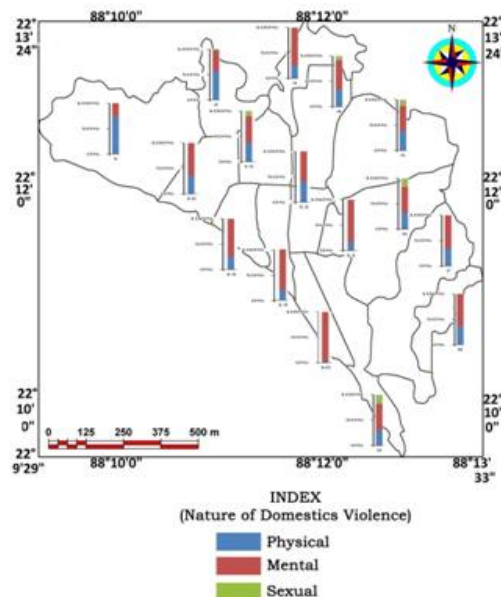

Fig5.

### Persons behind Domestic Violence

Domestic violence mainly occurred by husband. Housewives are told that people from the law as mother in law, father in law are also responsible behind domestic's violence. In some cases family member as father, elder brother, husband's friends take a part to do domestic violence. (Fig- 6)

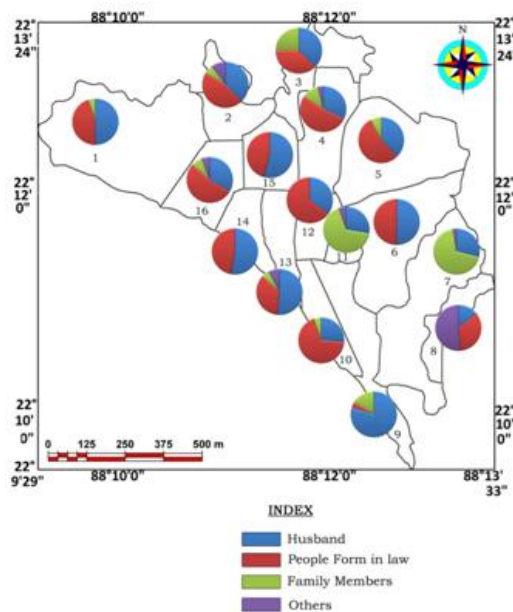

Fig6.

### 5. VULNERABLE ZONE & INDICATORS

Vulnerability derives from the Latin word “*vulnerare*” (to be wounded) and describes the potential to be harmed physically and/or psychologically. Vulnerability is often understood as the counterpart of resilience, and is increasingly studied in linked social-ecological systems. The Yogyakarta Principles, one of the international human rights instruments use the term "vulnerability" as such potential to abuse or social exclusion. .. Wikipedia

Taking a structuralize view, Hewitt (1997, p143) defines vulnerability as being: “...essentially about the human ecology of endangerment...and is embedded in the social geography of settlements and lands uses, and the space of distribution of influence in communities and political organization.” This is in contrast to the more socially focused view of Blaikie et al. (1994, p9) who define vulnerability as the: “...set of characteristics of a group or individual in terms of their capacity to anticipate, cope with, resist and recover from the impact of a natural hazard. It involves a combination of factors that determine the degree to which someone's life and livelihood is at risk by a discrete and identifiable event in nature or society.” Now a day's social vulnerability is an important phenomenon to discuss Social wellbeing.

We concenter Education, Income, Life Expectancy, Social Security, and time Base Women Security as the determining factor behind crime and CAW. We calculate the index value of those five indicators. The formula defining the HDI is promulgated by the United Nations Development Programme. Each of these indicators defined as a dimension with value between 1 to 0 with reference to maximum and minimum values. The general formula for calculating each dimension index is:

$$\text{Index} = (\text{Actual Value} - \text{Minimum Value}) / (\text{Maximum Value} - \text{Minimum Value}).$$

To calculate Social Vulnerability Index (SVI) we used Variables Cluster Index Method. The formula is:

$$SVI = \sum i/n. \text{ Where } i = \text{indicators and } n = \text{number of indicator.}$$

#### 5.1. Education

Education is one of the important factors behind crime and CAW. Sociologist concedes that education can reduce the crime. In the case of our country Education consist the minimal education means the

“the knowledge of A, B, C”. Still it is under debate that what will be the consideration point to certify a person an educated person. Rishi Rajnarayan Basu the famous educationalist said that in our education there is the lack of value education.

**Education Index of Diamond Harbour Municipality (Based on Sample Data - 2017)**

Ward No.	Maximum Literacy Rate (%)	Minimum Literacy Rate (%)	Education Index [ (Actual Value - Minimum Value)/ (Maximum Observed Value- Minimum Observed Value)]
1	91	0	0.91
2	98	0	0.98
3	97	0	0.97
4	91	0	0.91
5	100	0	1
6	95	0	0.95
7	97	0	0.97
8	100	0	1
9	95	0	0.95
10	97	0	0.97
11	100	0	1
12	97	0	0.97
13	95	0	0.95
14	81	0	0.81
15	96	0	0.96
16	94	0	0.94

**5.2. Income**

From the theory of crime income is the sociological factor that operates the crime. According Karl Marks when an individual person or group of people cannot able to perches their basic needs they become surplus population. In that condition they are involves with crime. In modern time lot of sociologist also consider income as a indicator of crime. As, World Bank economists Pablo Fajnzylber, Daniel Lederman, and Norman Loayza (2002) , it was found out that crime rates and inequality are positively correlated within countries and also between countries. The correlation is causation – inequality induces crime rates. This finding is parallel with the theory on crime by American economist Gary Becker, who pronounces that an increase in income inequality has a big and robust effect of increasing crime rates. Not only has that, but a country’s economic growth (GDP rate) had significant impact in lessening incidence of crimes. Since reduction in income inequality gap and a richer economy has an alleviating effect on poverty level, it implies that poverty alleviation has a crime-reducing effect. Vice versa some geographers said that income is not an indicator of crime. Only the type of crime will be changed by income status. As the evidence of this concept we can recognized some recent incident in our national and state scenario as “Cool Block Distribution Ghotala”, “2G Spectrum Ghotala”, “Sarada Scam” and very recent PNB Scam.

**Income Index of Diamond Harbour Municipality (Based on Sample Data - 2017)**

Ward No.	Highest Monthly Income (H.M)	Lowest Monthly Income (L.M)	Income Index (H.M-L.M)/(Highest Income Of Wards- Lowest Income Of Wards)
1	40000	3000	0.42
2	50000	2500	0.54
3	60000	2000	0.66
4	40000	2500	0.42
5	60000	2000	0.66
6	60000	2000	0.66
7	28000	2500	0.29
8	45000	3000	0.47
9	90000	2000	0.99
10	40000	2000	0.43
11	65000	4000	0.69
12	25000	2000	0.26
13	60000	5000	0.62
14	90000	1500	1
15	50000	3000	0.53
16	60000	2000	0.66

**5.3. Life Expectancy**

The crime rate probably doesn't directly affect the length of a person's life but it is indicative of social issues that do so.

High crime rates typically occur in areas of deprivation. Health care is in short supply especially in countries like the US where you have to pay for it. Wages are probably low leading to poor eating habits because basic essentials are too expensive. Housing is likely to be poor as well. Educational achievement orientation is also likely to be low considering the lack of opportunities in the area. This leads to a culture of trying to make yourself part of the community by joining gangs which gives a young person a sense of belonging. Invariably drugs and guns becomes part of that culture as doe's intergang violence.

For older members of the community all the environmental factors apply as does the stress of living with constant turf wars, robbery, and burglary. People don't feel safe on the street with the fear of crime often being high than the actual incidence of crime.

**Life Expectancy Index of Diamond Harbour Municipality (Based on Sample Data - 2017)**

Ward No	Highest Life Expending	Lowest Life Expending	Life Expending Index
1	64.5	29	0.59
2	68.33	34	0.57
3	72.5	32.4	0.69
4	61.86	29	0.55
5	63.6	30.3	0.56
6	58.6	18.42	0.67
7	76.67	29	0.79
8	60.22	29	0.52

9	85	33	0.87
10	62.25	39.33	0.38

12	62.25	26	0.60
13	58.6	29	0.49
14	68.5	31.67	0.61
15	72.5	39.33	0.55
16	68.5	26	0.71

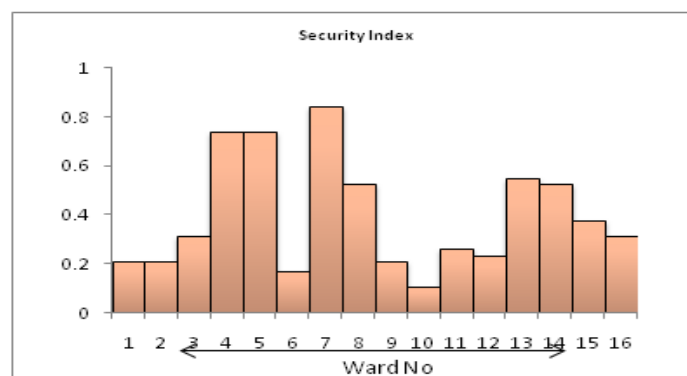

#### 5.4. Social Security

The word Social security covers a large meaning. In our study social security covers only police surveillance system. Police surveillance is one of the most determining factors behind crime. That must say police patrolling can reduced the occurrence crime. In our country a maximum number of populations have a negative approach about police surveillance system. Behind the occurred crime they blame the police's duty.

#### Security Index of Diamond Harbour Municipality (Based on Sample Data - 2017)

Ward No	Max. Distance From P.S (M)	Mini. Distance From P.S (M)	Security Index
1	2500	1500	0.21
2	2000	1000	0.21
3	3000	1500	0.32
4	4500	1000	0.74
5	4000	500	0.74

8	3500	1000	0.53
9	2000	1000	0.21
10	1500	1000	0.11
11	1500	250	0.26
12	1500	400	0.23
13	3000	400	0.55
14	3000	500	0.53
15	2500	700	0.38
16	2000	500	0.32

### 5.5. Time Based Woman Security

Also time is one of the important factors of crime. We think that crime against woman and the other types of crime should occur high intensively in night time. But that opinion has hug criticism. Most of the feminist says that crime against woman may occur any time. That's type of sentences are comes from our superstitious view.

#### Time Based Woman Security Index (Based on Sample Data – 2017)

Ward No	Time For Insecure For Women(T.I.W)	Total Insecure Time (T.I.W - 6 Am)	Total Secure Time (24 -Insecure Time)	Time Based Women Security Index (Secure Time /24)

16	0.66	0.71	0.94	0.63	0.32	<b>0.65</b>

**Vulnerable Zone  
of  
Diamond Harbour Municipality**  
(Based on Sample Data - 2017)

**6. RESULT AND DISCUSSION**

On the basis of vulnerable index data we classified the entered Diamond Harbour Municipality into 4 risk zone Very High Risk Zone, High Risk Zone, Moderate Risk Zone, and Low Risk Zone.

Ward no 12, 10 is the very high crime prone zone. Also we can say that this area is so vulnerable to live. Vice versa ward no 3, 4, 5, 6, 7, 9 are lesser crime prone zone. It is the best livable zone of the entire Diamond Harbour Municipality. Here the women are much secure than the other area.
